PROFESSIONAL SUMMARY

Web developer with hands-on experience building and maintaining production WordPress ecosystems, custom plugin architectures, and full-stack applications. Proven ability to design system workflows, develop financial process tools, and integrate APIs and webhooks. Skilled at leveraging AI to accelerate development and deployment cycles.

WORK EXPERIENCE

Web Developer

July 2025 – Present

InsBOSS USA | Remote

- Built and maintained the company's WooCommerce-based subscription platform, handling client payment processing, billing discrepancy resolution, and ongoing bug fixes across multiple interconnected sites.
- Customized and optimized WooCommerce plugins, monitoring site performance using PageSpeed Insights and uptime/downtime tracking tools to ensure platform reliability and speed.
- Designed and developed a custom finance system using an MVP approach — defining data models, role-based access, and approval logic to manage payment requests and internal financial workflows.
- Integrated webhooks and Gravity Forms to automate financial processes, enabling real-time notifications, data syncing, and conditional routing for payment requests and approvals.
- Managed support tickets and issue resolution through Zoho, and created technical documentation including SOPs and workflow guides for internal team use.
- Leveraged Claude Code CLI with custom plugins and skills to build context-aware systems, enforce project standards, and produce tailored, non-generic output. Used AI-assisted tooling to accelerate delivery across versioned releases.

Full Stack Developer Intern

January 2025 – May 2025

YKMK Global Training and Assessment, Inc. — Wesleyan University Hospital Philippines

- Merged a legacy patient database with the new hospital system, ensuring data consistency and integrity across platforms.
- Designed and implemented secure RESTful APIs for data exchange between frontend and backend services.
- Developed responsive interfaces using React and TailwindCSS, managing state with Context API for user sessions and patient records.
- Wrote Cypress end-to-end tests to automate form validation, workflow testing, and API response verification.

TECHNICAL SKILLS

Languages: JavaScript, PHP, Python, HTML/CSS

Frontend: React, TailwindCSS, Bootstrap, Elementor

Backend: Node.js, Express.js, WordPress, WooCommerce, MySQL

Integration & Tools: REST APIs, Webhooks, Gravity Forms, Zoho, Git, Figma, Cypress, PageSpeed Insights

AI & Automation: Claude Code CLI (plugins, skills), AI-assisted development, prompt engineering, workflow automation

EDUCATION

Bachelor of Science in Information Technology

2021 – 2025

Major in Web Systems Technology

Nueva Ecija Science and Technology (Wesleyan University Philippines)

CERTIFICATIONS

IT Specialist — HTML and CSS | Certiport, 2024

NCIII Bookkeeping | TESDA, 2019
